

Personal Portfolio Website - Project Documentation & README

Project Title

Personal Portfolio Website

Developed By

Ch. Ashritha

Branch: Data Science

Roll Number: 22RH1A6719

College: Malla Reddy Engineering College for Women

1. Project Overview

This project is a personal portfolio website developed to showcase my skills, projects, achievements, and contact information in a professional and interactive way.

2. Objectives

- Create a responsive and interactive portfolio
- Showcase my skills and achievements
- Provide quick access to social and professional links
- Represent my online presence as a developer

3. Key Features

- About Me Section
- Skills
- Projects
- Education
- Contact Form
- Social Links
- Responsive Design

4. Technologies Used

- HTML5

Personal Portfolio Website - Project Documentation & README

- CSS3
- JavaScript
- Bootstrap
- Git & GitHub

5. Implementation

- Designed layout using HTML and CSS
- Used JavaScript for interactivity
- Added responsive design via Bootstrap
- Deployed on GitHub Pages

6. Challenges Faced

- Ensuring responsiveness
- Maintaining clean UI
- Organizing content clearly

7. Conclusion

This project improved my web development skills and helped me build an online presence.

GitHub README
